

# Shortcut to Spanish Mnemonic Flashcards System

*How To Learn Spanish Words 3-5 Times Faster*

By Marcus Santamaria / Edited by Elena Chagoya

## How to increase you ability to remember Spanish Words 3-5 Times

"Repetition is the mother of learning" Tony Robbins

I want to share with you a simple technique. I discovered it by chance But it had profound effect on my Spanish ability. I later discovered I was combining two concepts essential to fast and permanent learning, imagination and repetition.

### **The humble but powerful Flashcard.**

I am sure you have seen them and maybe even used them. You put English on one side of a card and Spanish on the other. Then you look at the Spanish word and try to guess it's meaning in English.

### **Add a mnemonic and suddenly 1+1=3 or 4 or 5**

This is what I stumbled on. When I wrote a mnemonic on the flashcard my ability to remember the Spanish increased 4 or 5 times. I was able to learn thousands of words in no time flat.

If you use this system you will find this happening

You can look at a **Spanish** word and remember the meaning almost every time.

But, when you can look at an **English** word you only sometimes remember how to say it in Spanish.

### **Do this to make remembering how to say Spanish words permanent.**

When you don't remember how to say the Spanish word read the mnemonic. Do this for a few days and you will find you soon remember how to say the word in Spanish.

That's the system, I hope it helps you as much as it helped me. If it does we'll be talking together in Spanish soon. If you want to communicate with me in English or Spanish with questions, suggestions or anything I can help you on your journey to learn Spanish my email is [marcus@how-to-speak.com](mailto:marcus@how-to-speak.com)
